

Udsnit fra brev til HF

Dear home stay family

Hi! My name is Tsai Jieh and you can call me Cindy. I would like to be an exchange student because I was an exchange student in the USA from 2016-2017 and I improved my English, whether in writing or speech. I now speak English fluently. I become more independent and mature. Now I also would also love to use this as an opportunity to go to Denmark to experience European culture and become more confident and try the new things and activities. I am a friendly, polite, easygoing and adaptable girl.

My hobbies include dancing, which although I'm not the best at I still love anyway, and swimming. My parents have been taking me to pools and beaches to swim since I was little; I've even been on the swim team in junior high! I'm more attracted to athletics rather than academics, despite not being very good at ball-related sports such as basketball and soccer.

Our family used to go camping every weekend, but since my parents are busy because of work I hang out with my friends or cousins instead. We usually go to the movies, the gym, or an expo in the city if there's one showing. My favorite trip was planned with two of my friends to other cities, including all the restaurants and entertainment. It was a very cool learning experience!

My family consists of my parents and me. My family loves to watch TV together and on weekends we like to eat out, go camping and visit relatives. I'm an only child, but I have a huge extended family, and I'm very close to my cousins. I have to keep my own bedroom clean and do some house chores, such as washing dishes. I love being with my family because it feels very warm and cozy, so I would love to talk to your family about your daily life and tell you about mine in Taiwan.

All in all, I'm very excited to meet you!

Thank you, Cindy Tsai
